Energy transition is already inevitable, even without COVID-19. We hit the ground with a comprehensive survey covering leading energy players in Asia over the past month. We asked them about their preparations for the energy transition and whether the pandemic will affect the momentum.

COVID-19 and the energy transition landscape

The solid-phase transitions of zirconia are important phenomena for many industrial applications. Because of the lack of tools for resolving the atom displacement pattern, the transition kinetics has been disputed for over 60 years. Here, first-principles-based stochastic surface walking (SSW) pathway sampling is utilized for resolving the mechanism of ZrO₂ tetragonal-to-monoclinic solid-phase ...
