In 2018, stricter MoT rules were introduced meaning that any car undergoing an MoT test with an illuminated engine management light (whether it's a red or amber warning) would automatically fail.

LDV V80 Panel Van – Official site for LDV in the UK

Quite difficult access but got it changed. Turns out the old sensor was working fine (good hot/cold readings on bench test). My starting problem was air in the fuel filter, primed the system and it started fine. Think I have a tiny air leak somewhere. Engine management light is now on so I'll have to get a code reader & find out what's up.
