Ford New Holland Tractor Parts Catalog - Discounted ...

Turbocharger lag (turbo lag) is the time required to change power output in response to a throttle change, noticed as a hesitation or slowed throttle response when accelerating as compared to a naturally aspirated engine. This is due to the time needed for the exhaust system and turbocharger to generate the required boost which can also be referred to as spooling.

Turbocharger - Wikipedia

The J-2 was a liquid-fuel cryogenic rocket engine used on NASA's Saturn IB and Saturn V launch vehicles. Built in the U.S. by Rocketdyne, the J-2 burned cryogenic liquid hydrogen (LH2) and liquid oxygen (LOX) propellants, with each engine producing 1,033.1 kN (232,250 lb f) of thrust in vacuum. The engine's preliminary design dates back to recommendations of the 1959 Silverstein Committee.

2010 MaxxForce 11 and MaxxForce 13 Engine Training Program

The computer senses engine load. It also monitors valve timing through the camshaft position sensor. It then uses that VVT data to determine the best valve timing for the current conditions. The computer sends a signal to a solenoid on the timing cover. The solenoid controls oil flow through a special control valve in the camshaft bolt.
