I have a Lennox Elite Series furnace C 23-26-1. It constantly turns off and runs for different lengths of time. When it shuts off we have to turn off the furnace, turn it back on, then move an orange wire located on the blue (I'm assuming circuit) box and wait to hear a clicking noise (like you hear on a gas stove).

I have a Lennox C23-26-1 and it will lite, but only stay lit for a few minutes. Also it is not really blowing warm air out of the vents. My thermostat says low battery, but we have changed them twice to make sure. I cleaned the flame sensor and it worked for a day or so, but now it is back to only coming on briefly and not blowing war air out.
