Leopard 1 - Wikipedia

I read an article about the Leopard and Salisbury class frigates (which shared a common hull and machinery design), which said that they were fitted with eight ASR 1 diesel engines. This seems like a lot of engines. If you asked me, I would say four bigger, thumpier engines would be easier to live with than eight little, whizzy engines.

in 1965. Developed in an era when HEAT warheads were thought to make conventional heavy armour of limited value, the Leopard focused on firepower in the form of the German-built version of the British L7 105-mm gun, and improved cross-country performance that was unmatched by other designs of the era. The design started as a collaborative project during the 1950s between West Germany and
