Oceans in 2000 by the International Hydrographic Organization.

Life in the Ocean | Claire A. Nivola | Macmillan
Perhaps the biggest single question about ocean life concerns microbes — bacteria, their primitive relatives called Archaea, and other single-celled organisms such as protists and ameba. Species are difficult to define in bacteria and Archaea, which is why scientists use “taxa” instead, but the numbers are daunting: the oceans could contain tens of millions of taxa, and the exploration ...
