LED spotlight beam angles. Beam angle is the angle at which a spotlight casts it light and, in turn, the amount of area that's covered with light. The wider the spotlight beam angle = the more area below covered with light. Halogen spotlight beam angles are restricted to approximately 40 degree angles at most.

The Definitive LED Light Bulb Buying Guide - Bini's ...

LED floodlights emit a very wide beam of bright light, and are usually used as security lights with a PIR sensor. Generally, using floodlights in your garden will simply wash out the effects of any other lighting, however they can be used in a similar fashion to spotlights when positioned at ground level.

A Lark Photography Book: Digital Photography Expert ...

Hard light is the one that causes contrast and shadows. That light of a sunny day and sunshine, you know? Hard light causes sharp shadows with sharp edges and is usually the horror of portrait photographers. It is present for most of the day (usually from 10:00 a.m. to 4:00 p.m. - yes, the same time that you should not get sun).
