linear modeling (HLM), Rasch analysis, and other statistical techniques were uti- lized to facilitate an analysis of a large school system (see Kapadia, Coca, & Easton, 2007).

Linear Mixed Model Ysis Spss
The first principal component represented a general attitude toward property and home ownership. The index, or the attitude questions it embodied, could be fed into a General Linear Model of tenure choice. The strongest determinant of private renting by far was the attitude index, rather than income, marital status or household type.
