Liquefied natural gas plans up in the air thanks to ...

liquefied natural gas plant Under the agreement, New Fortress would fund, build, and operate an LNG import and regasification terminal and supply gas to power industrial facilities across Angola and work with the Ministry of Mineral Resources and Petroleum to explore the development of additional indigenous natural gas resources and a domestic liquefaction facility.

Liquefied Natural Gas Developments and Market Impacts

What is liquefied natural gas? Liquefied natural gas (LNG) is natural gas, a mixture of methane and ethane, that has been cooled down to liquid form so it can be easily transported. In its liquid state, LNG takes up around 1/600th the volume of natural gas in its gaseous state. It is odorless, colorless, non-toxic and non-corrosive.

The liquefied natural gas (LNG) industry is experiencing low prices and oversupply. Even before the COVID-19 pandemic, the LNG market was set for oversupply in 2020 and 2021 as new projects continued to grow capacity well beyond steady demand growth. Reduced gas demand because of the pandemic has added to excess supply, creating market volatility.
