Conclusion: If you are unsuccessful at locating the epicenter, describe how you modified your work to come to the correct answers. Record the information in your lab report. In the first try, I wasn't able to get the correct answers. I had to use my math skill and calculate the

### Locating an Earthquake - jaychase.com

To locate the epicenter of an earthquake, you must estimate the time interval between the arrivals of the earthquake's P and S waves (the S-P interval) on the seismograms from three different stations. The interval is measured to the closest second and then a graph is used to convert the S-P interval to the epicentral distance.

### Solved: Can Somebody Help Me With This Lab, Especially Wit ...

This second-day lab focuses on the culmination of the previous day's material - students triangulate the distance to an epicenter by analyzing seismograph readings Plan your 60-minute lesson in Science or Earth and Space Science with helpful tips from Kane Koller

### Example Answers - TeachEngineering

The epicenter of an earthquake is the point on Earth's surface at or above the earthquake's focus. In this exercise, you will determine the location of the epicenter of an earthquake that was recorded on seismograms at three different locations (Figure 1).

### Epicenter Location l.wmv

Reflection Questions: In the beginning, I was unsuccessful in location the epicenter. To locate the epicenter, I found that I had to determine the S-P interval time, plot the interval time against distance, and then correctly draw the circles and find where the circles intersect.

### Lab Report Format for Earthquake Epicenter Lab by Prezi ...

In this activity, students use an online simulation—Virtual Earthquake—that is accessible through the Earthquakes Living Lab interface, to locate the epicenter of an earthquake by making simple measurement on three seismograms, recordings of an earthquake's seismic waves detected by instruments (seismographs) far away from the earthquake.
