## Logitech Squeezebox Radio

The Squeezebox Radio can be powered by an optional proprietary battery pack, made available in March 2010. When running off Logitech Media Server, two Squeezebox Radios can be synchronized and set to play one stereo channel each, thus working as a stereo device. Also, by using headphones one can use one single Squeezebox Radio as a stereo device.

ReplayGain is the name of a technique invented to achieve the same perceived playback loudness of audio files. It defines an algorithm to measure the perceived loudness of audio data..  
ReplayGain allows the loudness of each song within a collection of songs to be consistent. This is called 'Track Gain' (or 'Radio Gain' in earlier parlance).
