Although this may seem obvious enough, the Diana F+ is designed only for 120 film. The Diana+ 35mm Back attachment is designed for the Diana F+ to only take pictures with 35mm film, but it does not in any way affect the inner components and design of the inside of the Diana camera. Of course there are frames that come with the 35mm back, but this does not change the 120 film design of the interior.
