Generated by Semtech LoRa IOT parts, including the SX1272 and SX1276 transceiver chips, LoRa's modulation format is best described as a "frequency modulated (FM) chirp." The core IP that enables LoRa is the ability to generate a stable chirp using a frac-N phase lock loop (PLL). Here can read the core LoRa patent. Other modulation formats include frequency shift keying (FSK), phase shift ...

Lora (cânt?rea??) - Wikipedia

LoRa is an RF modulation technology for low-power, wide area networks (LPWANs). The name, LoRa, is a reference to the extremely long-range data links that this technology enables. Created by Semtech to standardize LPWANs, LoRa provides for long-range communications: up to three miles (five kilometers) in urban areas, and up to 10 miles (15 ...

LoRa is purely a physical (PHY), or "bits" layer implementation, as defined by the OSI seven-layer Network Model, depicted in Figure 3. Instead of cabling, the air is used as a medium for transporting LoRa radio waves from an RF transmitter in an IoT device to an RF receiver in a gateway, and vice versa.
