BaoFeng UV-5R
:welcome: Morty, To begin, low-band VHF television is very prone to receive interference from man-made noises such as fluorescent light ballasts, electric motors like your kitchen blender or a neighbor's air conditioner, etc., so I propose a very inexpensive test to see if you have enough signal versus noise to allow reception of channel 5.

Antenna advice for Low VHF channel | DTV USA Forum
VHF is the first band at which wavelengths are small enough that efficient transmitting antennas are short enough to mount on vehicles and handheld devices, a quarter wave whip antenna at VHF frequencies is 25 cm to 2.5 meter (10 inches to 8 feet) long. So the VHF and UHF wavelengths are used for two-way radios in vehicles, aircraft, and handheld transceivers and walkie-talkies.
