### Lucas Acr Alternator Manual - atharvaconsultancy.com

Check the reading on the voltmeter again. The voltage should increase by between 0.5 and 2 volts to around 13.6 to 15.8. If the reading stays the same or drops, that means the alternator isn't charging and you may need a new one. If the reading is more than 2 volts higher, that could mean that your alternator is overcharging.
