Army Publishing Directorate

This training circular (TC) provides a training program for the palletized load system (PLS) operator according to AR 600-55. It provides standardized training and testing in the operation, maintenance, and safety of the PLS. It stresses hands-on training with minimal classroom instruction and does not include any theater-unique requirements.

M1074 Technical Manual - wsntech.net

The Palletized Load System (PLS) is a truck-based logistics system that entered service in the United States Army in 1993. It performs line haul (long distance), local haul (short distance), unit resupply, and other missions in the tactical environment to support modernized and highly mobile combat units.
