*University of Derby*

*The Making of the English Landscape is a 1955 book by the English local historian William George Hoskins. It is illustrated with 82 monochrome plates, mostly photographs by Hoskins himself, and 17 maps or plans. It has appeared in at least 35 editions and reprints in English and other languages. The book is a landscape history of England and a seminal text in that discipline and in local history. The brief history of some one thousand years is widely used in local and environmental history cours*

*First, the book is dense, heavy, printed on good glossy paper. It's like a paperback textbook. Hayes moves through different sectors of the industrial landscape, from mining to smelting to electrical generation and distribution. He covers the transportation networks that we all use, but probably take for granted.*
