Outboard Motors, Boat Parts, Marine Engines, Inboard Boat ...
When this happens, your engine overheats very quickly. This is much more serious in a diesel engine than in gas-powered boats. Since diesels run at piston compressions of 350psi to 500psi, which is three to four times that of a gas engine, heat builds up very rapidly. Within 60 seconds, this high compression builds up a lot of heat that can do damage.
