The Iraqi marsh lands, which are known as the Garden of Eden, cover an area about 15000-20000 sq. km in the lower part of the Mesopotamian basin where the Tigris and Euphrates Rivers flow. The marshes lie on a gently sloping plan which causes the two rivers to meander and split in branches forming the marshes and lakes.

Ma dan | people | Britannica
Uncontrolled releases of Tigris and Euphrates River waters after the 2003 war have partially restored some former marsh areas in southern Iraq, but restoration is failing in others because of high soil and water salinities. Nearly 20% of the original 15,000-square-kilometer marsh area was reflooded by March 2004, but the extent of marsh restoration is unknown. High-quality water, nonsaline ...
