AWS VPN CloudHub: You might have multiple remote networks that need to connect securely with AWS VPC. For such scenarios, you would create multiple VPN connections, and use AWS VPN CloudHub to provide secure communication between these sites. This is a hub and spoke model that can be used either for primary connectivity or as a backup option.

Mastering AWS Development - PDF eBook Free Download

AWS SAM created an event JSON when it initialized the project, and we can use it for this purpose. The output looks different from the one you got when using cURL. First, you get some runtime information—how long the function ran, and how it would be billed if it actually ran on AWS infrastructure.
