None of this was ever a problem with the B3. One more thing I will mention. I have read where the bottom end of the engines are essentially the same as the B6D twin cam engines. Much tougher then a B3 or 8 valve B6. Ryal (dragonhealer) told me the B6ME I am running should have a safe redline of 7,200 rpm's. I never had mine that high.

Crank: All the DOHC B6 variants use the same crank, but there are two common versions (just like all the other Mazda B series engines). The small nosed crank came in engines produced before the middle of 1992, and the big nosed crank came in engines produced after mid year 1992. The oil pumps are different for each, as are the front pulleys.

Mazda B6 Engine Mods
When multi-valve technology and turbochargers combined forces in the late '80s, Mazda was leading the way. Their B6 and larger BP series engines combine sophistication with excellent torque and power for the cubic capacity and, not surprisingly, they performed well in contemporary Group A rallying.
