Introduction to Mycology - Medical Microbiology - NCBI ...

Mycology is the study of fungi. Fungi are eukaryotic microbes, meaning that they contain a "true nucleus", they do not contain chlorophyll, and they absorb all their nutrients from their surrounding environment, particularly from dead and decaying organic material. Fungi are observed both microscopically and macroscopically (as colonies growing on agar plates).

Medical Mycology Handbook

The clinical nomenclatures used for the mycoses are based on the (1) site of the infection, (2) route of acquisition of the pathogen, and (3) type of virulence exhibited by the fungus. Mycoses are classified as superficial, cutaneous, subcutaneous, or systemic (deep) infections depending on the type ...
