Both Microsoft and Apple have had GUI standards for more than 20 years. For instance expressed in the books "The Windows Interface: An Application Design Guide" (1987, ISBN 1-55615-439-9) and "Human Interface Guidelines: The Apple Desktop Interface" (1987, ISBN 0-201-17753-6). This information is also online.

User Interface Principles - Win32 apps | Microsoft Docs

This all boils down to context: A user interface needs to be designed for specific users, goals, and tasks. Guidelines may be a reasonable starting point, but they are only a starting point. The value in UI consistency lies in effective learning, by making it easy to transfer knowledge from another product without interfering with ease of use.
