33000: Survey of the Vertebrates: Survey of the major features of the vertebrates, including brief modern classification of the major groups and summary review of their morphological features, evolutionary history, distribution, ecology, and social behavior. Specific additional characteristics such as mimicry, ectothermy-endothermy, cannibalism, migration, predation, defense and use of venom ...

Undergraduate Courses | The City College of New York

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses, which is why it covers so much.

Biology with Lab – Easy Peasy All-in-One High School

High School Biology emphasizes experimentation and critical thinking, in addition to introducing detailed information about living organisms. Students often feel confident in learning the detailed content of the class, but encounter challenges when trying to reason through through experimental materials, methods, and outcomes.

Translation is the communication of the meaning of a source-language text by means of an equivalent target-language text. The English language draws a terminological distinction (which does not exist in every language) between translating (a written text) and interpreting (oral or signed communication between users of different languages); under this distinction, translation can begin only ...

Let's review. Antigone is an ancient literary work written by Greek writer Sophocles. It wouldn't seem to have much relevance in today's world, since with all the changes and advancements, the ...

Modern Day Relevance of Antigone - Video & Lesson ...

The medial labial consonants f and m in wʰfmann coalesced into the modern form "woman", while the initial element wʰf, which had also meant "woman", underwent semantic narrowing to the sense of a married woman ("wife"). It is a popular misconception that the term "woman" is etymologically connected to "womb". "

Charles Darwin's The Descent of Man was published in 1871. Ever since, it has been the foundation stone of human evolutionary studies. Richerson et al. reviewed how modern studies of human biological and cultural evolution reflect the ideas in Darwin's work. They emphasize how cooperation, social learning, and cumulative culture in the ancestors of modern humans were key to our evolution and ...
