The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible.

Joseph Lstiburek - GreenBuildingAdvisor

Throughout the balance of this digest the terms attic and roof will and can be used interchangeably.. In cold climates, the primary purpose of attic or roof ventilation is to maintain a cold roof temperature to control ice dams created by melting snow, and to vent moisture that moves from the conditioned space to the attic (ventilation acts to bypass the vapour barrier created by most roof ...

www.epa.gov

When designing a building's envelope and its interaction with the mechanical system, temperature, humidity, rain and the interior climate often are ignored. The focus for the building may be more on aesthetics and cost than on performance. This article was first published in the ASHRAE Journal, February 2002, pages 36-41. Reprinted with permission.
