Modeling with IBM SPSS: 2nd

...

The aim of this seminar is to help you learn about the use of Multilevel Modeling for the Analysis of Longitudinal Data. The seminar will feature examples from Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence by Judith D. Singer and John B. Willett. The seminar will address the following issues.

Multilevel linear models in Stata, part 2: Longitudinal data

longitudinal modeling techniques available in the IBM SPSS mixed-effects program (MIXED). Annotated screen shots provide readers with a step-by-step understanding of each technique and navigating the program.

Multilevel Models for
Longitudinal Data -
www.bristol.ac.uk
One application of
multilevel modeling (MLM) is
the analysis of repeated
measures data. Multilevel
modeling for repeated
measures data is most often
discussed in the context of
modeling change over time
(i.e. growth curve modeling

Routledge2010 Paperback

Two-level multilevel model using SPSS (chapter 3 v1)
Multilevel models (also known as hierarchical linear models, nested data models, mixed models, random coefficient, random-effects models, random parameter models, or split-plot designs) are statistical models of parameters that vary at more than one level. An example could be a model of student performance that contains measures for individual students as well as measures for classrooms within ...
