Amazing Time-Lapse: Bees Hatch ... - National Geographic  
Honeybees live in colonies with one queen running the whole hive. Worker honeybees are all females and are the only bees most people ever see flying around outside of the hive. They forage for food, build the honeycombs, and protect the hive. Many species still occur in the wild, but honeybees are disappearing from hives due to colony collapse disorder.

Honeybee - National Geographic Kids

Honeybee hives have long provided humans with honey and beeswax. Such commercial uses have spawned a large beekeeping industry, though many species still occur in the wild.
