Natural Home Solutions Pest Control

Those coffee grounds are good for more than just a cup of coffee. Try using your leftover coffee grounds in spots around the outside of your home where you think pests are coming in. Many critters can't stand the smell of the grounds and will steer clear. You can also use coffee grounds to critter-proof your garden.

Keep Your Home Bug Free with These DIY Pest Control Methods

The apple maggot is the most destructive pest of apples grown in home orchards. This insect is a type of fly that pierces the skin of ripening fruit and lays eggs. In 5 - 10 days, the eggs hatch a maggot that burrows through the fruit. These pests can be managed by using sticky red sphere traps. Hang one trap for every 100 apples in a tree.
