and Other Harms Research

Progesterone is a natural diuretic – it prevents your cells from taking up excess sodium and water, so it can help reduce fluid retention. When it drops too low women complain that they retain fluid during the day (particularly in the legs, ankles, and tummy), find their rings feel too tight for their fingers, look puffy in the face and often have swollen heavy (and often sore) breasts.

3 Natural Ways to Boost Progesterone during Menopause ... Natural progesterone cream is not a patentable, product so pharmaceutical funding for progesterone research has gone in the direction of expensive patentable progestins such, as synthetic birth control pills. Unlike
