Amazon.com: badiou mathematics

Badiou's innovation in philosophy is his idea of mathematical ontology based on axiomatic set theory. Badiou advances the slogan: "Mathematics is ontology". In other words, he believes that maths (specifically, set-theoretical maths) is the same as, or can explain, the nature of reality or being. This claim is a decision which is posited.

Fabio Gironi, Naturalising Badiou: mathematical ontology ...

Abstract In this article, I discuss Alain Badiou's 2008 address titled "The Three Negations." Though the text was originally presented in a symposium concerning the relationship of law to Badiou's theory of the event, I discuss the way this brief address offers an introduction to the broad sweep of Badiou's metaphysics, outlining his accounts of being, appearing, and transformation.
