Crash Course - Anatomy & Physiology

Key Concepts and Summary. The nervous system consists of two subsystems: the central nervous system and peripheral nervous system. The skull and three meninges (the dura mater, arachnoid mater, and pia mater) protect the brain. Tissues of the PNS and CNS are formed of cells called glial cells and neurons.

Anatomy & Physiology 1; Chapter 9 the Nervous System ...

We can anatomically divide the nervous system into two major regions: the central nervous system (CNS) is the brain and spinal cord, the peripheral nervous system (PNS) is the nerves (Figure 12.1.1). The brain is contained within the cranial cavity of the skull, and the spinal cord is contained within the vertebral canal of the vertebral column.
