New holland 376

I've just got a newholland 376 baler for some straw and hay baling. I've never had a small baler before and am a bit unsure of a couple of things 1. The baler is currently using sisal twine, would I need to change anything to use plastic? 2. What pto speed should I run it at ? And lastly any advice on what to check/grease/sharpen before I start Any advice would be greatly appreciated.
