ThePapApp

The guidelines generally advise a reduction in the number of tests women get over their lifetime to better ensure that they receive the benefits of testing while minimizing the harms, and include a preference for co-testing using the Pap test and HPV test for women age ages 30 to 65.

Changes to cervical cancer prevention guidelines: Effects ...

Two screening tests can help prevent cervical cancer or find it early— The Pap test (or Pap smear) looks for precancers, cell changes on the cervix that might become cervical cancer if they are not treated appropriately.; The HPV test looks for the virus (human papillomavirus) that can cause these cell changes.Both tests can be done in a doctor's office or clinic.

Pap Smears -- Clinical Recommendation

A pap smear is an important part of a woman's healthcare plan. And it's important to know how often you should have the exam. Dr. Megan Pally goes over the latest guidelines.

The American Cancer Society Guidelines for the Prevention ...

The AAFP supports the U.S. Preventive Services Task Force (USPSTF) clinical preventive service recommendation on cervical cancer.

Cervical Cancer Screening Guidelines for Average-Risk Women

Women aged 21 to 65 should be screened with cytology (commonly known as Pap smear) every 3 years. As an alternative, women aged 30 to 65 who want to be screened less frequently may choose the combination of cytology and human papillomavirus (HPV) testing every 5 years, which offers similar benefits to cytology only. This is an A recommendation.

U.S. Preventive Services Task Force Issues New Cervical ...

Most women between the ages of 21 and 29 need a pap smear every three years. The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation.

NEW PAP GUIDELINES

Therefore, Pap test screening for individuals with HIV who are aged 65 years and older should not be discontinued [Gravitt et al. 2013]. The Pap test is useful in identifying those who require further evaluation, which can include more frequent testing, referral for colposcopy and directed biopsy, and subsequent treatment of biopsy-proven ...

New cervical cancer guidelines start making Pap smears ...

With the advent of the Papanicolaou (Pap) test in 1945, mortality from this malignancy declined more than 70% (Datta et al., 2008; Spitzer, 2007). An annual Pap smear was the recommended guideline for many years. New cervical cancer guidelines were released by the United States Preventative Services Task Force (USPSTF) on March 14, 2012.

New Pap Smear Guidelines

These new guidelines combined with HPV vaccination, support the commitment of Member States to implement cervical cancer prevention programme as part of the 2013–2020 Global Action Plan for the Prevention and Control of Noncommunicable Diseases and will help ensure that cervical cancer ceases to be a public health problem.
