domain.

No Solution Math

Sometimes equations have no solution. This means that no matter what value is plugged in for the variable, you will ALWAYS get a contradiction. Watch this tutorial and learn what it takes for an equation to have no solution.

What does no solution in algebra mean - Answers

If equation 1 was solved for a variable and then substituted into the second equation a similar result would be found. This is because these two equations

Bookmark File PDF No Solution Math

have No solution. Change both equations into slope-intercept form and graph to visualize. These lines are parallel; they cannot intersect.

EQUATIONS WITH MANY SOLUTIONS OR NO SOLUTION

We're asked to use the drop-downs to form a linear equation with no solutions. So a linear equation with no solutions is going to be one where I don't care how you manipulate it, the thing on the left can never be equal to the thing on the right. And so let's see what options they give us. One, they ...

Solving Equations with Infinite Solutions or No Solutions ...

Solving these will involve multiplying through and simplifying, before doing the actual solution process.

If you're not comfortable with parentheses, study up first. Then come back here.

Then we'll look at the two weird kinds of solutions:

"no solution", and the solution that is "all x".

The solution process ends in nonsense in the former case

...

What Does It Mean When An Equation Has No Solution ...

About "Equations with many solutions or no solution"
When we solve a linear equation in one variable, we may find exactly one value of x that will make the equation a true statement. But, when we simplify some equations, we may find that they have more than one solution or they do not have solution.

to each other) or...

Equations with many solutions or no solution worksheet

then there are "infinite solutions", meaning, when graphed, the two equations would form the same line. If the variables disappear, and you get a statement that is never true, such as $0 = 5$ or $4 = 7$ then there is "no solution", meaning, when graphed, the two equations would form parallel lines, which never intersect.
