...

A survey by the Cambridge Occupational Analysts reported that in the seven years leading up to 2014, the number of women interested in studying STEM subjects – including engineering – in college has increased more than that of their male counterparts. In fact, general engineering was being considered by more than 20 percent of female respondents, a 16 percent increase over the seven year period.

Why Do So Many Women Who Study Engineering Leave the Field?

## Download File PDF Number Of Women In Engineering

Women who go to college intending to become engineers stay in the profession less often than men. Why is this? While multiple reasons have been offered in the past, a new study co-authored by an MIT sociologist develops a novel explanation: The negative group dynamics women tend to experience during team-based work projects makes the profession less appealing.
