If you or a loved one are in need of skilled nursing care, it is important to know that not all skilled nursing facilities are the same. While all, by definition, offer skilled nursing care, other services may differ significantly from one facility to another.

Your Tracheostomy Tube: Answers to Common Questions

A minimum of two people who are competent in tracheostomy care are required for all tracheostomy tube changes (except in an emergency if a second person is not readily available – e.g. transporting the child). The tube change should occur before a meal or at least one-hour after to minimise the risk of aspiration.

30 Questions to Ask a Skilled Nursing Facility

Your Tracheostomy Tube: Answers to Common Questions. With a tracheostomy, a small hole (stoma) is surgically made in your windpipe (trachea) through your neck, just below the Adam's apple. A tracheostomy tube ("trach tube") is then placed into the stoma. Air goes into and out of your lungs through the tube.
