Bass - Adds an octave to the lower detection range to improve accuracy below 40 Hz. This is achieved at the expense of increasing the minimum detection time to around 100 ms. Lower frequencies take longer to detect as their waveforms cycle over a longer period of time compared to high frequencies. For example, a 20 Hz waveform takes 50 ms to ...

Tuner - Effect Plugin
Octave switching lets you independently raise or lower the upper and lower manual ' s range by 1 octave; Pedal Sustain allows the Pedal voice to smoothly decay upon release, similar to a double string bass; Manual Bass allows the Pedal part to be played on the lower manual of the Skx; Lower to Pedal couples the lower manual registration to the ...
