In business theory, disruptive innovation is innovation that creates a new market and value network or enters at the bottom of an existing market and eventually displaces established market-leading firms, products, and alliances. The concept was developed by the American academic Clayton Christensen and his collaborators beginning in 1995, and has been called the most influential business idea ...

A mudpot, or mud pool, is a type of acidic hot spring, or fumarole, with limited water. It usually takes the form of a pool of bubbling mud. The acid and microorganisms decompose surrounding rock into clay and mud. The mud of a mudpot takes the form of a viscous, often bubbling, slurry. As the boiling mud is often squirted over the brims of the mudpot, a sort of mini-volcano of mud starts to ...

IEEE 802.11 - Wikipedia

The Institute of Electrical and Electronics Engineers (IEEE) is a 501(c)(3) professional association for electronic engineering and electrical engineering (and associated disciplines) with its corporate office in New York City and its operations center in Piscataway, New Jersey. The main scope of the IEEE is dedicated to advancing technology for the benefit of humanity.

In science fiction, the most stereotypical portrayal of a cyborg is a person (or, more rarely, an animal) with visible added mechanical parts. These include the superhero Cyborg from DC Comics and the Borg race from the Star Trek Universe.. However, cyborgs can also be portrayed as looking more robotic or more organic. They may appear as humanoid robots, such as Robotman from DC's Doom Patrol ...
