Troubleshooting Oracle Internet Directory

LDAP OID Reference Guide Object identifiers are used throughout LDAP, but they're particularly common in schema elements, controls, and extended operations. This document provides a table of some of the most common OIDs used in LDAP along with a brief explanation of their purpose and (when applicable) a reference to the appropriate specification.

Discoverer - eDirectory (LDAP) | Oracle Community

to multi-master LDAP replication, OID also supports Oracle database Real Application Cluster (RAC) and Oracle Application Server Clusters (OracleAS Cluster). ? OID provides un-paralled ease of use for a general purpose directory storage via Oracle Directory Services Manager (ODSM).

Configuring an OID Authentication Provider in ... - oracle.com

We had a consultant from Oracle here and now it works. The point seems to be that you need an SSL connection between the database and OID. And SSL needs proper setup. You have to study the manuals on Oracle networking at great lengths to avoid any mistakes in this. We are working on a description for this which I am willing to share with

Creating a JD Edwards EnterpriseOne LDAP Configuration for OID
Oracle Enterprise Gateway 5 5 / 25 LDAP refers to Lightweight
Directory Access Protocol. LDAP is based on a simplified version of
X.500 directories. It is used to access a hierarchical directory of
information on a directory server. 1.3. Setup Used for this Guide: !
Gateway 11.1.1.x ! Oracle OID Server 11g ! LDAP Browser 2.Directory
Details 2.1.

LDAP OID Reference Guide – LDAP.com

Oracle Internet Directory Oracle Internet Directory (OID) is an LDAP
server which uses an Oracle database as a datastore. In this article I
will demonstrate the basic steps necessary to set up OID as a
replacement for local Oracle Net configuration files and Oracle Names
Server.

Provisioning LDAP User Information for the First ... - Oracle

Oracle Internet Directory (OID) is an LDAP server which uses an Oracle
database as a datastore. Client machines can use the OID for all TNS
lookups. With OID. Once all client machines are configured correctly
any modifications to the TNS lookups can be done from a central

location reducing the amount of client machine administration.

Oracle Internet Directory

OID uses standard Oracle database structures to store its internal tables. In Oracle version 9 databases, by default, many Oracle LDAP Table Stores use tablespaces with names beginning with the OLTS_ (and occasionally P1TS_) prefixes. Relevant default schemas used may include ODS (for "Oracle directory server") and ODSCOMMON.

ORACLE-BASE - Oracle Internet Directory

OID is an LDAP compliant directory service. You can configure JD Edwards EnterpriseOne to use OID as the LDAP server. This enables administrators to use the directory service to manage user information such as user IDs, passwords, and user-role relationships.

Oracle Internet Directory 11g – Oracle Enterprise Gateway ...

Oracle Internet Directory Oracle Internet Directory is a LDAP v3 compliant directory with meta-directory capabilities. It is built on the industry leading Oracle database and is fully integrated into Oracle Fusion Middleware and Oracle Applications. Thus, it is ideally suited for Oracle environments or enterprises with Oracle database expertise.

Introduction to LDAP and Oracle Internet Directory

System Administrators use the procedures in this section to configure LDAP-based corporate user directories, such as OID, Sun Java System Directory Server, Oracle Virtual Directory, Active Directory, IBM Tivoli Directory Server, or an LDAP-based user directory that is not listed on the configuration screen.

Install Oracle Internet Directory (OID) in Standalone mode

The Oracle directory replication server uses LDAP to communicate with an Oracle directory (LDAP) server instance. To communicate with the database, all components use OCI/ Oracle Net Services. Oracle Directory Services Manager and the command-line tools communicate with the Oracle directory servers over LDAP.

Configuring ODI External User Authentication - oracle.com

If you want to leverage eDirectory or directories, the 9iASr2 approach is to access them "thru OID". Exploit OID's directory integration platform features to sync between OID and eDirectory. The sample code and manual chapters for OID-iPlanet sync (in the OID manuals) might be reusable for your situation.
