The Honeywell Home T5 7-Day Programmable Thermostat is designed for simple installation and setup. With an extra-large backlit display, it is easy to configure and set your preferred heating and cooling selections.

How Do You Replace an Old Honeywell Thermostat?

Use a screwdriver to disconnect the now-labeled wires. Unscrew the wall plate and remove it. Tape the wires to the wall with low-tack painter's tape, being careful not to cover the lettered labels as you might accidentally tear them off. If your new thermostat is smaller than the old one, you may need to remove drywall anchors or do some putty repairs.
