[www.i-intelligence.eu](http://www.i-intelligence.eu)

Open-source intelligence (OSINT) is data collected from publicly available sources to be used in an intelligence context. In the intelligence community, the term "open" refers to overt, publicly available sources (as opposed to covert or clandestine sources). It is not related to open-source software or collective intelligence.. OSINT under one name or another has been around for hundreds of years.

Open-source intelligence - Wikipedia  
Most of the tools and techniques used to conduct open source intelligence initiatives are designed to help security professionals (or threat actors) focus their efforts on specific areas of interest. There is a dark side to open source intelligence: anything that can be found
