...

But the two HDMI ports on the UHD50X are 2.0 and 1.4, so 4K/120 will never be in the cards on this projector. The Optoma also doesn't have any anti-tearing technology (AMD's FreeSync is the only one supported on the Xbox One), so there is the chance of screen tearing artifacts since the refresh rate of the UHD50X can't be locked to the frame ...

Optoma UHD50X 4K DLP Gaming Projector Review

Update: Projector began flickering 6 months into use to the point that it's unwatchable. Sent back to Optoma for RMA for \$100 at my own expense, only to be told that I'd need to spend another \$200 to replace the bulb and complete the repair. They offered to send it back without a bulb also.
