calculator - Algebrator

A regression model is a

linear one when the

model comprises a

linear combination of

the parameters, i.e., (β_0, β_1)

$= \beta_0 + \beta_1 x$, where the

function is a function

of x . Letting $\beta_0 = \beta_0$, we

can then see that in

that case the least

square estimate (or

estimator, in the

context of a random
