Paper Folding Conic Sections
Students fold "patty paper" to create each of the conic sections, one at a time. They create three "layers" for each conic section. For the parabola, they fold one layer to create a parabola, a second layer that shows the relationship between the focus and the latus rectum, and a third layer that examines the locus of points.

With each fold a certain amount of paper is lost to potential folding. The loss function for folding paper in half in a single direction was given to be $L = \frac{6}{t} (2^n + 4) (2^n - 1)$, where L is the minimum length of the paper (or other material), t is the material's thickness, and n is the number of folds possible. [18]
