(PDF) Personal Construct Psychology, constructivism, and... A case can even be made that Kelly's personal construct psychology—considered by many the first systematic use of constructivism within clinical psychology—is a form of limited realism (Stevens, 1998). Chiari and Nuzzo (1996b) contend that limited realist approaches should not be considered constructivist

Personal Construct Psychology In Clinical  
Personal construct theory (PCT) or personal construct psychology (PCP) is a theory of personality and cognition developed by the American psychologist George Kelly in the 1950s. The theory is concerned with the psychological reasons for actions. Kelly proposed that individuals can be psychologically evaluated according to similarity – dissimilarity poles, which he called personal constructs ...

(PDF) Personal Construct Theory - ResearchGate  
Personal Construct Psychology is a "new" (in fact more than sixty years old) approach to psychology which tentatively has been characterised as "person-centred", "cognitive" or "humanistic". That means that the focus is on the "personal" ways that individuals use to "construe" (understand, interpret and even actively design) their world. It was developed by George A. Kelly (1905-1967), a ...
