prevention.

Estimation of production cost and revenue - process design

A rough rule of thumb for the chemical industry is that \$1 of annual sales requires \$2 of fixed-capital investment. In a chemical processing plant where this rule applies, the total capital investment is \$2,500,000, and the working capital is 20 percent of the total capital investment. The annual total product cost amounts to \$1,500,000.
