Diversity of Forms in Bryophytes Bryophytes have two alternating plant bodies the gametophyte and sporophyte. Gametophyte (independent plant) Hornwort (thalloid plant) Liverwort (thalloid and leafy plant) Moss (leafy plant) At this point you should know that mosses of the three bryophytes is the most diverse and advance group.

First, bryophytes developed cuticles, different from the layer of skin at the base of our fingernails and toenails. A plant cuticle is a waxy layer that covers the plant that keeps water in and keeps the plant from drying out. Second, bryophytes developed stomata, which are pores in the cuticle that allow gas exchange.

Plant Diversity Page pd-1 Diversity in the Plant Kingdom I. Introduction All modern terrestrial plants are the descendants of algae that adapted to a terrestrial habitat roughly 500 million years ago. Compared to water, land is an erratic habitat where temperature and moisture availability may change abruptly and dramatically.

### **Plant Diversity I: Bryophytes and Seedless Vascular Plants**

As mentioned earlier, bryophytes are a group of plants that are non-vascular and don't have seeds. If they don't have seeds, how do new plants grow? Instead of seeds, bryophytes have spores. Spores are single cells that produce all the genetic information and capability to grow into a new plant.

Bryophytes are gametophyte dominant, meaning that the more prominent, longer-lived plant is the haploid gametophyte. The diploid sporophytes appear only occasionally and remain attached to and nutritionally dependent on the gametophyte.

### **Diversity in the Plant Kingdom I. Introduction**

Bryophyte, traditional name for any nonvascular seedless plant—namely, any of the mosses (division Bryophyta), hornworts (division Anthocerotophyta), and liverworts (division Marchantiophyta). Most bryophytes lack complex tissue organization, yet they show considerable diversity in form and ecology. They are widely distributed throughout the world and are relatively small compared with most seed-bearing plants.
