Activity 2.3.7 Residential Site Planning Introduction When a building is designed apart from a specific site, an opportunity is lost to match

Activity 2.2.1 Concrete Pad Estimate

Civil Engineering and Architecture (CEA) is a high school level specialization course in the PLTW Engineering Program. In CEA students are introduced to important aspects of building and site design and development. They apply math, science, and standard engineering practices to design both residential and commercial projects and document their work using 3D architectural design software.
