special pricing when you package your text with other student resources.

Fundamentals of-power-system-economics-solution-manual
so the units for the price of power are the same as for the price of energy. Typically the price of retail energy is about 8¢/kWh.³ At that price, the price of power would be 8 cents/hour for a kilowatt of power flow, which is the same. These units are convenient for home use but are inconveniently small for bulk power systems.
