Buoyancy: Calculating Force and Density with Archimedes ...

The topic of scientific revolutions has been philosophically important since Thomas Kuhn's account in The Structure of Scientific Revolutions (1962, 1970). Kuhn's death in 1996 and the fiftieth anniversary of Structure in 2012 have renewed attention to the issues raised by his work. It is controversial whether or not there have been any revolutions in the strictly Kuhnian sense.

Prentice Hall

(Third edition) by Stuart Russell and Peter Norvig. The leading textbook in Artificial Intelligence. Used in over 1400 universities in over 125 countries. The 22nd most cited. computer science publication on Citeseer (and 4th most cited publication of this century).

Reductionism in Biology (Stanford Encyclopedia of Philosophy)

The peripheral nervous system (PNS) refers to all the neurons (and their supporting cells, or glia) of the body outside the brain and spinal cord (central nervous system [CNS]). The brain is the organ that decides how a person responds to what happens in the surrounding world.

Epistemology. Epistemology is the
study of
knowledge. Epistemologists
concern themselves with a number
of tasks, which we might sort into
two categories. First, we must
determine the nature of knowledge;
that is, what does it mean to say
that someone knows, or fails to
know, something? This is a matter
of understanding what knowledge
is, and how to distinguish between
cases in which someone ...***

Pebblebrook High School Home Page

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...
